DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 and 11-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the primary reason for allowance is the inclusion of the limitation that the first and second sensing traces form a loop, where the first and second sensing traces are disposed on different levels of a substrate, which is not found singularly or in combination within the prior art.

Regarding claim 11, the primary reason for allowance is the inclusion of the limitations that the first and second pluralities of sensing traces form first conductive loops and that the third and fourth pluralities of sensing traces form second conductive loops, where the first and second sensing traces and third and fourth sensing traces are disposed on different levels of a substrate, which is not found singularly or in combination within the prior art.

The closest prior art reference to the claimed invention is Chao et al. (US 7,176,907), which teaches of a digitizer table in Figure 3, which shows first sensing

traces (X01-Xa+2) connected between a processor (10) and a potential node and also shows second sensing traces (Y01-Ya+2) connected between a processor (10) and a potential node, however, Chao et al. do not teach that the first sensing traces and the second sensing traces form a loop. Instead Chao et al. teach that the first sensing traces form a loop and that the second sensing traces form a loop (Column 8, lines 9-13) rather than the two arrays of sensing traces forming a loop together.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
